DETAILED ACTION

This office action is a response to the amendment filed on 7/25/2005.

Examiner's Comment

1. Since generic claim 1 is allowable, claims 8 and 9, directed to the method of making a magnetic head assembly previously restricted from the election of species, are now subject to bring rejoined. Claims 1-13 are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Since all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, the restriction requirement made in the Office action mailed on 1/24/2005 is hereby withdrawn.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: Upon further consideration with applicant's arguments, examiner agrees with the applicant's counsel that the prior art of record of Freitag et al. filed on 4/18/2002 is not a valid reference. In addition, the closest reference of Fox et al. (US PAT. 5,974,657) teach a process of making a spin valve read sensor comprising a process of applying a first magnetic field to the hard bias structure in a first direction that is perpendicular to the ABS and to major thin film planes of layers of the read sensor (as shown in Fig. 13) and a second magnetic field to the hard bias structure in a direction that is parallel to the ABS, but perpendicular to the first direction a shown in Fig. 14. However, Fox et al. fail to teach a

first magnetic field to the hard bias structure in a first direction that is parallel to the ABS and parallel to major thin film planes of layers of the read sensor and a second magnetic field to the hard bias structure in a direction that is antiparallel to the first direction. Therefore, it would not be obvious to modify Fox et al. by applying a first magnetic field to the hard bias structure in a first direction that is parallel to the ABS, since doing so would destroy the structure of spin valve read sensor of Fox et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
